

CLAIMS

I claim:

1. A collapsible table comprising:

a frame formed from a plurality of pivotally connected frame members, the
5 frame being movable between an expanded configuration and a collapsed configuration;
a table top connected to the frame, the table top including at least one drink
holder;

a container assembly having a flange portion provided with mounting holes, and
a container pouch,

10 whereby the container assembly is connected to the frame at a position beneath
the table top by the plurality of frame members being inserted through the mounting holes.

2. The collapsible table of claim 1 in combination with a bowl, the table top further
comprising an opening sized and shaped to receive the bowl.

3. The collapsible table of claim 1, wherein the table top and the container assembly are
15 fabricated from flexible materials allowing the table top and the container assembly to flexibly
collapse with the frame as the frame is moved between the expanded configuration and the
collapsed configuration.

4. The collapsible table of claim 3 wherein the table top is fabricated from a fabric
material.

20 5. The collapsible table of claim 1, wherein each of the plurality of frame members is
pivotally connected at a first end to a first joint and at a second end to a second joint and at a
point intermediate the first and second ends to an other frame member at a third joint.

6. The collapsible table of claim 5, wherein the frame further comprises a plurality of
corner straps, each corner strap being vertically connected between the first joint and the second
25 joint.

7. The collapsible table of claim 6, wherein the corner straps are adjustable in length and
capable of being tightened.

8. The collapsible table of claim 1, further comprising a table top umbrella hole and a
container assembly flange umbrella hole.

30 9. The collapsible table of claim 8 in combination with an umbrella having a support pole,
wherein the support pole is inserted and retained within the table top umbrella hole and the
container assembly flange umbrella hole.

10. The collapsible table of claim 1, further comprising at least one pocket.
11. The collapsible table of claim 10, wherein the at least one pocket is attached along at least one edge of the table top.
12. The collapsible table of claim 1, wherein the table top is releasably connectable to the
5 frame.
13. The collapsible table of claim 12, the frame further comprising protruding a plurality of pins and the table top further comprising a plurality of grommets, wherein engagement of the grommets with the pins releasably connects the table top to the frame.
14. The collapsible table of claim 1, wherein the table top is fixedly attached to the frame.
- 10 15. The collapsible table of claim 1, wherein the container pouch is insulated.
16. The collapsible table of claim 1, wherein the frame members are fabricated from a rigid material.
17. The collapsible table of claim 16, wherein the rigid material is steel, aluminum or alloys thereof.
